

This document is used as a product introduction on Folihub homepage. Three features of the product are listed, which are “secure”, “flexible” and “inspiring”, trying to appeal to potential users who visit our homepage, and attract them to use our product.

Secure:

Your E-portfolios will be encrypted and stored on the cloud, only authorized users can access your data. Folihub acts as a reliable backup tool that digitalizes traditional portfolios, so you do not need to worry about any physical damage and careless misconduct. All e-portfolios will be access controlled, your data security is always our prioritized concern.

Flexible:

By using Folihub, your work can be accessed at any time, anywhere. We provide several options for you to present your e-portfolio. You can either download them and share the local files, or generate a web page with real-book flipping page style and share the link. Feel free to choose any method you preferred to share and access!

Inspiring:

Couldn't think of any idea to write your e-portfolio? Folihub provides several fantastic portfolio templates for you to start. Both portrait and landscape are available. Just fill in with texts and photos you like to create a nice and customized e-portfolio.
