Client Interview:
General Requirement:
1. Which prototype do you prefer?

Functional Requirement:
1. Web or APP (prefer Web)
2. Upload: text, picture, hyperlink, electronic file, audio, video
3. Edit mode and viewing mode
4. Export: automatically export personal portfolio as a pdf file or a hyperlink
5. like github or google docs? (public to anyone or those who are authorized)
6. Server and database

UI Requirement:
1. colour
2. layout (personalize or fixed)
3. style - cute, simple (?
4. show some templates

1. wechat/discord? communication channel (prefer wechat)
    a. wechat add ZYF-Chloe (?)
    b. discord invitation link: https://discord.gg/7TWG4T (expires @24/8/2020 17:43)
2. web / app (prefer web)
3. eportfolio specification （video,）
4. camera / ps / ins
5. functionality clarifying (input: text, picture, hyperlink, electronic file, audio, video, edit: editing (free/template/templates))
6. export (PDF/book or both)
7. meeting schedule

- framework? reactjs + nodejs
- database: as long as it works
- server: client: google cloud (need investigation) we may prefer Heroku, but we could left it for later discussion
- communication channel: discord
- uploading video? storage will be significant large
    - url?
    - in-build video display function → later discussion, do the basic functionalities first
- which prototype?
    - editing tool: get the product quicker and no more extra expenses, reasonable timeframe and expenses
- meeting schedule: every sprint
- Motivation model

- proud: Users should be proud to share their portfolio with their family and friends (I interpret this as a client requirement on UI/UX)
- post any questions and progress on discord

End of Sprint 1 Meeting 12/9/2020 17:00 AEST
- present prototype
    - client concerns: finish on time? priorities
- present what we have done in sprint 1
    - motivation model
    - product backlog
    - frontend presentation
        - instructions page for users → short video? tutorial? hints?
- what we are going to do for sprint 2
    - client thinks it is impressive that we have already something to present in 2 weeks
    - user picture and user profile

End of Sprint 2 Meeting 10/10/2020 17:00 AEDT

- Still have some bugs need to fix on edit folio part
- client questions or concerns?
    - no questions
    - comment: more intuitive compare to sprint 1
    - google slides → sharing with clients, for product analysis report
    - prefer an additional social functionality adding on the current product
        - will add to user stories, but not actually included on the current plan
        - client: focus on high priority functions
- any questions could be posted on discord or via email
